

# EcoCatch Flies.

More sustainable outdoor fly control.

Fly activity on the exterior of your business can put your business at risk. The closer flies are to structures, the higher the chances are they may get inside and potentially spread harmful pathogens. Flies can also detract from your customer experience, especially in highly trafficked, public outdoor areas.

Exterior fly control can be an uphill battle. To help win the fight against these pathogen-spreading insects, Terminix® offers EcoCatch Flies, an effective, sustainable outdoor fly control solution.

## How it works

The lockable, durable dual-layer trap is designed to stand up to outdoor conditions, with the outer layer serving as a protective shell for the interior trap. The interior trap contains a liquid bait lure to draw flies in. Once they enter the trap, the flies cannot exit. In controlled tests, EcoCatch Flies caught 60 percent more flies in 24 hours than competitive outdoor fly traps.<sup>1</sup>

## Sustainably designed

EcoCatch Flies is designed to be a more sustainable outdoor fly control solution by eliminating the need for plastic bag liners, reducing overall plastic waste. In addition, each unit contains up to 33 percent recycled plastic and is 100 percent recyclable at the end of its life cycle.<sup>2</sup>

## Flexible mounting options for targeted control

EcoCatch Flies can be used nearly anywhere for targeted control. Units can be wall or fence-mounted, hung from a structure, or installed on a freestanding pole.

<sup>1</sup> Based on controlled testing over a 24-hour period comparing EcoCatch Flies to competitor disposable liquid bait alternatives.

<sup>2</sup> Expected life cycle is 5 years.

### CATCHES UP TO 60% MORE FLIES

than leading competitors in a 24-hour period.<sup>1</sup>

### LOCKABLE AND SECURE

to help reduce impacts to non-target pests and the environment.

### FULL-SERVICE MAINTENANCE

performed by Terminix®.

### NO POWER REQUIRED,

allowing for installation nearly anywhere.
